

## FACTOR FOR HIV

**R. Prema, M.A., M.Phil\***

Immune system is the natural armour, fabricated in our body. It would exhaust when we get old, this state of affair is known as “Kapoli Saceomah”

This is seen among youth at present. Present day youth are affected by H.I.V. The Syndrome which is acquired by one, as medical world considered as acquired Immuno Deficiency Syndrome.

It is an universal problem which identified in Los Angels in 1981. Dr. Lukeman Decnon identified the H.I.V. in France in 1985. It originated in Africa. In 1959, the preserved blood of the captains in ship in Europe contained H.I.V. The science of virology has traveled a long way since 1796 when the first successful vaccination was introduced by Edward Jenner.

The need to know the factors behind H.I.V. is obvious. Applauses to the government for laying AIDS control programme. An invitation from U NICFF to the scholars to look into the plights of AIDS patients.

The growth population in Asian countries poses a serious threat to this acquirement.

As per Mr. Prakash Patle Vante, the Director of Health service Department, Maharashtra State IEC, stress that there are three main agencies for the infection.

1. The sex workers
2. From the Sex workers to the customers
3. From the customers to the family

Are the agential avenue to carry on.

The heterosexual affairs of the sex workers is the prime factor for AIDS. Their customers carry the virus and they lead its infection in their family.

We should fully realize the gravity of the situation and the direct threat to the mankind is coming through the above – mentioned situations.

The sex workers in male also is to be noted. For their financial strength men included in these workers . They usually live in big cities. Dr. Raman Ganga Kethkar from AIDS Research station, Pune, remarked that male sex workers dwell in big cities they really responsible for AIDS infections.

The person behind the window period are not identified through any test. If such a person become a blood donar, it will reason for inceasement of AIDS. The developed nations has a good number of affected about 1:250,000 under this category.

In the north east India, the injection of toxic into the body also cause for H.I.V. About 50% to 60% of student community in Northeast India have H.I.V. under this circumstances.

In Mumbai 3 or 5% of AIDS acquired are the pregnant mothers in families. The entire world detach the children who are with H.I.V. universally, 25 million children world become H.I.V. infected.

Moreover, a limited persons are affected by H.I.V. due to their services in Health centers, through bound an strict precautions. 0.4% of the world population are in H.I.V. are under this category.

Sexual carriers sho uld be in its proper ways. As an embodiment of the principles is the result of fairness in it.

It is necessary or expedient in the national interest that every one should aware of H.I.V.

The educational institution is also revamped to find solutions to this emerging challenge and we do to create awareness among the society.
